

Adam Speakers

Product Specifications

Alta Audio's Adam epitomizes the perfect blend of style and performance—a three-way floorstanding tower available in Alta's signature finishes, and custom finishes as well.

An Audiophile Perspective

The Adam is truly an example of the sum being greater than its parts, the parts themselves being spectacular. The 3rd generation ribbon tweeter used in Adam ensures excellent clarity and dynamics for exceptional upper register output. The Alta Audio-designed wide-band midrange is underhung for exceptionally low distortion and ultra-fast transient response, while its aluminum pole increases dispersion. Rounding out the package is a supremely powerful XTL* Bass (patent pending) woofer, featuring a black anodized cone, heavy duty 6-hole cast frame, low-loss rubber surround, solid aluminum phase plug, and rubber magnet boot.

(Shown in Rosewood)

***Extended Transmission Line** — Alta Audio's proprietary technology that applies sonic geometry to tune speaker cabinets as if they are musical instruments, delivering an accurate, fast, and powerful low frequency response.

MSRP **\$17,000.00** (*Piano Black*)

MSRP **\$18,000.00** (*Rosewood or Beech*)
